

Missouri's 2016 Traffic Safety and Blueprint Conference

October 18-20, 2016
Holiday Inn Executive Center
Columbia, Missouri

7th Annual CMITE Sponsored Traffic and Safety Poster Session

Again this year the conference committee will offer researchers in Traffic and Highway Safety an opportunity to display the results of their research through **Posters** that will be displayed in the area adjacent to Exhibit Booths. This will provide Conference attendees an opportunity to interface with the researchers as they will have their breaks and meals in the same area as the Exhibit Booths and Research Posters.

We are inviting researchers to submit a 250 word narrative describing the research undertaken and a picture or sketch of the proposed poster. Research published prior to 2014 will not be accepted. The goals in designing a poster should be to provide a clear overview of the work, present enough material to explain the research, and stimulate discussion and questions. The Poster must fit within the 4'x 4' space provided. No "PowerPoint" posters will be accepted. No promotional or advertising material is to be on the poster.

Researchers from universities, consultants, State DOTs, local agencies and private firms are invited to participate. Poster authors should plan on being present with their Poster during the conference breaks/exhibit times.

Members of the Central Missouri Institute of Transportation Engineers will review judge the Posters. First and second place prizes (\$100/\$50) will be awarded during the closing session of the Conference for the best Poster.

Deadline is: September 19, 2016

Submit electronically to: Garrett Depue (CMITE President)
